

ROLDEX 2 MPL 38 & 1 MPL 76

Premium Quality Lightweight Oil Only Absorbent Rolls

Low-linting Premium Oil Only Absorbent Rolls

Low-linting Premium Oil Only Absorbent Rolls preferentially absorb oil, whilst repelling water. The Low-linting Premium Oil Only Absorbent Rolls will remove oil from water and are used in internal and external situations where oil needs to be absorbed without saturating the absorbent with water.

The Low-linting Premium Oil Only Absorbent Rolls have a polypropylene core with a fine fiber layer on both sides. This procedure makes the pads extremely low-linting and improves the absorption ability (wicking) and strength of the material.

The Low-linting Premium Oil Only Absorbent Rolls are perforated so that it can be adjusted for all kinds of applications.

Applications:

the Low-linting Premium Oil Only Absorbent Rolls are ideal for use in factories, on lakes, rivers, harbours or at sea and will remain afloat even when saturated with oil.

- 100% meltblown polypropylene covered with a fine fiber layer on both sides; won't rip, tear or fray even when saturated
- Will absorb up to 25 times its own weight
- Dimple pattern speeds wicking of liquid throughout the material for faster, easier cleanup
- Absorbs and retains oils and oil-based liquids—including lubricants and fuels—without absorbing water
- Floats to clean up spills on water
- Bright white color makes absorbed oil easier to see; draws attention to machine leaks and clearly shows saturation level during spill response
- Perforated material is easy to tear to size so you only use what you need
- Low-linting Premium Oil Only Absorbent Rolls are ideal for catching drips and soaking up spills
- Flame-resistant material won't burn immediately like cellulose; melts when exposed to high heat while on the job
- Non toxic, non reactive and fast acting

Parameters of product

Length (cm):	4800
Width (cm):	2x38 / 76
Absorption (Liter/Unit):	117
Weight (kg):	7.3
Number of rolls per unit:	2 / 1
